

Dyeing Auxiliary Chemicals Portfolio

OMNOVA Solutions supplies a wide variety of auxiliaries for dyeing processes for many different fiber types.

PRODUCT	TYPE	APPLICATION	DESCRIPTION
SEDGEKIL™ MF-3	Silicone	Defoamer	Minimizes foaming from aeration equipment. Suitable for use as a waste water lagoon defoamer.
SEDGEKIL™ BHF	Non-silicone	Defoamer	A 100% active product formulated to control foam in high temperature pressure dyeing equipment including jets and becks. Controls foam formation in the heating and cooling of dyebaths. Suitable for use in all dye equipment.
SEDGEKIL™ GGD	Silicone	Defoamer	Formulated to control foam in high temperature pressure dyeing equipment including jets and becks. Controls foam formation in heating and cooling of the dyebath. Suitable for use in all dye equipment.
SEDGEDYE™ RCT NEW	Naphthabutyl benzoate	Dye carrier	Carrier designed for use in low pressure, low temperature becks or jets to aid in dyeing of polyester and poly-wool blends.
SEDGEFIX™ FB	Cationic polymer	Dye fixative	Used as pad bath fixer for directs, vats and acid dyes. Suitable for use in pad, jet and continuous.
SEDGEDYE™ BLS	Benzoate ester	Leveling agent	Specially formulated blend of organic esters and surfactants designed as a rapid-dye leveling agent for exhaust dyeing of polyester and poly-cotton blends. Contains no chlorinated solvents and, in certain cases, can be used to replace traditional dye carriers. Can be used in jet dyeing or in package dyeing applications. Suitable for use in beck, jet and jig.
SEDGELUB™ EMM	Polyacryl-amide	Lubricant	Used in bleaching or dyeing of cotton or poly-cotton blends in jet processes. Provides protection against crack marks and abrasion in batch operations and can also be used in continuous operations to prevent drags and bruises. Suitable for use in all dye equipment.
SEQUACLEAN™ MC-4	Surfactant blend	Machine cleaner	Versatile boil-out surfactant that removes dyes from jet and beck dye equipment. When used in combination with a caustic and a reducing agent, it removes disperse, cationic, acid and fiber reactive dyes. Suitable for use in all dye equipment.
SEDGECLEAN™ GTR	Cationic polymer	Machine cleaner	Versatile boil-out surfactant that removes dyes from jet and beck dye equipment. When used in combination with a caustic and a reducing agent, it removes disperse, cationic, acid and fiber reactive dyes. Suitable for use in all dye equipment.

Consult your technical service representative for recommendations for your specific requirement.

NOTE: Although the data supplied above is believed to be accurate, each user is advised to make an independent determination as to whether the described product(s) is/are appropriate for a particular use or application, whether such use will comply with all applicable laws or regulations, or whether such use will infringe the intellectual property rights of third parties.
