

Organic Softeners

OMNOVA Solutions continually expands its softener and lubricant product offering to advance the development of fabric finishes. The following products are formulated from organic fatty acids, in some cases blended with waxes and silicones to achieve the necessary performance criteria.

Product	Type	Application
Mykosoft [®] 129	Amide	Cationic softener designed to run in fluoropolymer formulations. Resin compatible.
Mykosoft [®] 139	Quaternary	Non-yellowing with a smooth, soft hand and excellent drape. Apply by pad or exhaust. Resin compatible.
Mykosoft [®] 230	Amide blend	Excellent non-yellowing napping softener; provides needle-cutting protection. 30% active.
Mykosoft [®] CSS	Amide blend	45% active high concentration softener/lubricant blend. Good performance and economics in a variety of applications.
Mykosoft [®] LVC-2	Cationic	Very soft hand with excellent drape. Compatible with resin finishes.
Mykosoft [®] JET-3	Cationic blend	Exhaustible, non-yellowing softener.
Mykosoft [®] MD-9	Nonionic ester	Concentrated compressive shrinkage lubricant and softener. Excellent in denim applications.
Mykon [®] 122	Nonionic fatty glyceride blend	Soft, full hand with excellent resistance to scorch. Does not affect lightfastness and has excellent compatibility. Excellent lubricant for sanforizing applications.
