

SEQUAPEL® LVN Release Coat for Film Substrates

SEQUAPEL LVN release coat provides release properties to film substrates such as film packaging tape, medical tape, and protective tapes. **SEQUAPEL LVN** release coat provides release performance against aggressive adhesives on light gauge films. **SEQUAPEL LVN** release coat dilutes readily with water and is very effective at low coat weight levels.

FEATURES

- Nonionic for good compatibility
- Provides release properties with various types of adhesives
- Effective at low coating weights
- Dilutes readily with water
- Cures under low temperature conditions

TYPICAL PROPERTIES

Appearance:	Light Tan
Ionic Type:	Nonionic
pH:	4.0 – 5.5
Solids:	31.5 – 33.5%
Density (25°C):	9.2 lbs/gal
Viscosity (25°C):	< 50 cps RVT/25°C #2 spindle @ 20 rpm

Comments: OMNOVA Solutions provides many primers and release products designed for the tape and label industry. Because the nature of tape and label products is influenced by the selection of adhesives, application techniques and use expectations, etc., a great variety of coatings has been developed. Please call your OMNOVA Solutions representative to discuss your particular primer or release coating needs.

STORAGE AND HANDLING

- Shelf life of 6 months (always test to recertify release force).
- Stir, mix well before using.
- Protect from freezing.
- Refer to Material Safety Data Sheets for additional details.

NOTE:

Although the data supplied above is believed to be accurate, each user is advised to make an independent determination as to whether the described product(s) is/are appropriate for a particular use or application, whether such use will comply with all applicable laws or regulations, or whether such use will infringe the intellectual property rights of third parties.
