Laminate Solutions for  
**KITCHEN and BATH**

## THE FINISHING TOUCH FOR DISTINCTIVE HOMES

OMNOVA Solutions manufactures a comprehensive selection of decorative laminates designed for use in the creation of attractive kitchen and bath interiors. From cabinets to appliances and nearly everything in between, our Paper, Flat, 3D and Specialty Laminates represent hundreds of eye-catching, as well as functional, surfacing solutions – laminates that look great, perform better and offer greater overall value. Together, they provide you with a “single source” solution for all your surfacing needs.

### The OMNOVA Advantage

- We offer multiple constructions across a broad portfolio of products: Paper, Flat, 3D and Specialty Laminates. With our unmatched product selection – including hundreds of designs and patterns – there’s no need to look anywhere else.
- **Harmony Collection™** patterns provide matching designs across our four product portfolios.
- Colors, patterns and embossings can be easily customized to create unique and differentiated products that meet specific decorative or functional needs.
- Domestic production provides shorter delivery lead times, so products – even custom designs – are available faster.

### Cabinet Exteriors

#### Vertical Surfaces

- With numerous combinations of topcoats and substrate weights, there’s a Paper Laminate that’s right for just about every light-duty application.
- For added protection, **pre•empt™** Paper Laminates resist stains caused by cooking oils, as well as many other common household products.

#### Doors and Drawer Fronts

- 3D Laminates feature seamless design flexibility – perfect for cabinet doors and drawer fronts.
- Our Paper, Flat and 3D Laminates can be combined to create five-piece door fronts.

### Trim and Molding

- Depending on your performance requirements, our Paper, Flat and **repels™** Specialty Laminates provide profile-wrapping solutions for molding and trim components.

### Cabinet Interiors and Shelving

- Paper Laminates provide low cost surfacing solutions.
- Optional **Durability Plus™** coating for Paper Laminates provides improved face-to-face rub resistance, as well as greater resistance to wear caused by cardboard packaging materials.
- Optional **TouchKote™** topcoat for Paper Laminates is a premium, optically-enhanced coating that increases the level of realism by simulating the tactile feel of real wood.
- To help avoid costly water damage, new light-gauge **repels** Specialty Laminates provide superior water holdout, durability and wear resistance compared to standard paper laminates.

## Laminate Solutions for KITCHEN and BATH

### Appliances

- For the high-tech, high-polished look of today's interiors, appliances, cabinets and components, the innovative Brushed Elements design – part of our **radiance™** Flat Laminates portfolio – provides a metallic appearance without the added cost, weight and maintenance of actual metal materials.

### Flooring

- We work with flooring manufacturers to design decorative vinyl laminates for use in their flooring components. Printed OMNOVA Flat Laminates are laminated to a floor backing as part of a three-layer flooring product. Our designs are recognized throughout the industry for their realistic woodgrain patterns, trend-leading colors and abstract designs.

### Sinks, Tubs and Shower Enclosures

- With available proprietary coatings and alternative constructions, our Specialty Laminates meet the unique demands of numerous specialized uses, including bath and shower surrounds, shower curtains, detail trim and more. With a wide selection of decorative patterns, our acrylic specialty films can turn ordinary substrates into surfaces that look like the real thing, yet clean-up faster and easier.

*Though our laminates can be used in many applications, it is important for customers to select a laminate with durability and other performance attributes that match the requirements of the specific end-use application – not all laminates are suitable for all applications. Laminates used on exposed or horizontal surfaces of a product, for example, often require more durability than interior vertical surfaces. Customers should consider the OMNOVA Laminates Technical Specifications, processing requirements, the specific end-use environment and other application-specific factors when selecting appropriate laminates.*

## LAMINATE PORTFOLIOS

### Paper Laminates

Suitable for a variety of light-duty, low-wear applications, Paper Laminates can be flat-laminated or profile-wrapped to most wood-based substrates. Available in a large variety of patterns, including hundreds of woodgrains.

Our **pre-empt** Paper Laminates use a special topcoating/substrate combination to provide an increased level of resistance to most common household staining agents, including cooking oils.

### Flat Laminates

Suitable for numerous decorative and functional applications, Flat Laminates are flexible vinyl films that can be flat-laminated or profile-wrapped to most wood-based substrates. They are scratch, abrasion and stain resistant. A high performance coating provides an added degree of protection, durability and easy clean-up.

**radiance** Flat Laminates are designed with a higher temperature formulation than our standard Flat Laminates. They can be hot-laminated to metal and plastic to create custom surfaces that provide a more durable, cleanable and decorative solution compared to paint or powder coating treatments of metal surfaces.

### 3D Laminates

3D Laminates – also known as rigid thermofoils (RTF) – can be membrane-pressed or vacuum-formed to contoured surface profiles to eliminate the need for T-molding, visible seams, edge-banding and special edge treatments.

**surf(x)®** 3D Laminates combine the dimensional profiling of our standard 3D Laminates with additional impact, scratch and stain resistance. Enhanced durability makes **surf(x)** 3D Laminates suitable for use on many horizontal surfaces.

### Specialty Laminates

Available in a number of unique coating and film combinations, Specialty Laminates meet unique surfacing needs – everything from commercial appliances and consumer electronics to automotive accessories and home furnishings.

**repels** Specialty Laminates are light-gauge 1.7-mil films that provide superior water holdout compared to standard paper laminates. They help avoid unsightly – and expensive – water damage, so they're an ideal choice anywhere there's an increased risk for water damage.

**KITCHEN and BATH**

## ABOUT US

OMNOVA Solutions is a major innovator of decorative and functional surfaces, emulsion polymers, and specialty chemicals. A creative and technology-driven company, OMNOVA designs and manufactures surface laminates, commercial wallcoverings and performance upholstery that meet the decorative and functional demands of a variety of end uses and applications.

Drawing on influences from around the world, OMNOVA's design staff combines color, patterns, and textures to achieve distinctive designs that provide a wide range of decorative solutions for today's interior environments.

Customer focus sets us apart. To answer your needs precisely, we take the lead in developing, applying, and marketing innovative new technologies and techniques that make our products look better, last longer, and offer greater value. In addition, the breadth of our product lines offers the greatest number of optimal solutions for your decorative and performance requirements.
