

## Chemical Resistance Technical Bulletin

OMNOVA Solutions is a leading designer and manufacturer of decorative laminates used in healthcare environments and applications, ranging from cabinetry to over-the-bed trays. **EFX™** 3D Laminates are an environmentally preferred surfacing alternative to traditional 3D Laminates and vinyl surfaces. **EFX** 3D Laminates can be membrane-pressed or vacuum-formed to contoured surface profiles, eliminating the need for T-molding, edgebanding and visible seams. Elimination of seams helps mitigate the accumulation of potential contaminants and simplifies cleaning.

A stringent program of cleaning and disinfecting has been proven to reduce the incidence of hospital acquired infections. OMNOVA's **EFX** 3D Laminates can be safely cleaned and disinfected with the following cleaners and disinfectants. In laboratory testing using both the NEMA LD 3.4 and ASTM D3450 test methods, **EFX** 3D Laminates were shown to have no discoloration or damage to the finish when cleaned and disinfected with the following products:

- Asepticare TB-II
- Birex® SE disinfectant
- Bleach 5:1
- Cavicide® surface disinfectant
- Citrace® germicide
- CitriGuard® II hard surface disinfectant
- Clorox® germicidal wipes
- Dispatch® spray hospital cleaner disinfectant with bleach
- Fade-A-Dyne® stain remover
- Fresh Breeze™ TB disinfectant
- Lysol® spray disinfectant
- Precise™ hospital cleaner
- PDI® Super Sani-Cloth® germicidal wipes
- PDI Sani-Cloth HB germicidal wipes
- PDI Sani-Cloth Plus germicidal wipes
- SaniZide Plus® germicidal solution
- Virex® II 256 cleaner
- Virox® AHP 5 disinfectant cleaner surface wipes
