

harmony
PROGRAM™

ALL OF YOUR
LAMINATE
SOLUTIONS

OMNOVA Solutions' **harmony**™ program facilitates design and color matching across multiple OMNOVA product constructions – Paper, Flat and 3D Laminates including **surf(x)**® 3D Laminates. The program provides the fabricator of furniture, cabinetry and store fixtures the best application of laminates based on functional and budget requirements.

OMNOVA Solutions has partnered with other industry leaders including manufacturers of High Pressure Laminates (HPL) and Thermally Fused Melamines (TFM) to extend the color matching beyond just OMNOVA constructions.

The **harmony** program provides end users the opportunity to achieve design consistency, while at the same time, the ability to value-engineer their products based on cost and performance needs.

Benefits of the **harmony** program include:

- Uniform design for furniture and fixtures with coordinating laminates
 - » Single design available on multiple substrates
 - » Eliminates concerns of design exclusivity
 - » Facilitates end user custom designs
 - » Simplifies supply chain
 - » Eliminates the need to find coordinating matching designs across multiple manufacturers
- Controls end product cost by using a range of color-matched constructions based on performance requirements
 - » Facilitates value engineering of components
- Reduces development time and improves speed to market for new products
 - » Single decision maker for design approval
 - » Coordinating designs across supply chain
