

# radiance™ Flat Laminates

by OMNOVA Solutions

# CROSS REFERENCE

To assist you, OMNOVA Solutions has prepared the following **radiance™** Flat Laminate Cross Reference Guide. The guide identifies a number of our popular **radiance** Flat Laminates whose color and pattern match those of our 3D Laminates and **surf(x)®** 3D Laminates. In turn, our 3D Laminates and **surf(x)** 3D Laminates closely match the color of many High Pressure Laminates (HPL) and Thermally Fused Melamines (TFM) available in today's market. Together, this selection of products enables specifiers to easily and accurately coordinate the finishes in store fixtures, cabinetry and furniture.

OMNOVA <b>radiance</b> Flat Laminate Reference Number and Description	SAP Number	Availability	OMNOVA 3D Laminate Reference Number and Description	SAP Number	Availability	Thermally Fused Melamines

**PLEASE NOTE:** A high-temperature formulation allows **radiance** Flat Laminates to be hot-laminated to metal and plastic substrates. Due to this high-temperature formulation, the surface appearance of **radiance** Flat Laminates may differ in gloss and texture from their 3D Laminates and **surf(x)®** 3D Laminates counterparts.

Red text indicates a primary color match. Black indicates a secondary color alternative.

**PLEASE NOTE:** Comparisons are based on color aspects only. Grain pattern, texture, embossing and gloss level may vary significantly between products. OMNOVA recommends that customers always compare aesthetic as well as performance characteristics of different products, and obtain actual samples of the various laminate constructions before making a final selection. Comparisons should be made under controlled lighting conditions.
