

To assist you, OMNOVA Solutions has prepared the following Laminate Cross Reference Guide. The guide identifies a number of popular High Pressure Laminates (HPL) and Thermally Fused Melamines (TFM) which closely match the color of many of our STOCK **surf(x)** 3D Laminates.

OMNOVA 3D Laminate Description	SAP Number	Thermally Fused Melamines								High-Pressure Laminates				
		Arclin	Coveright	Flakeboard	Funder	Panolam	Pluswood	Roseburg Duramine	Tafisa	Uniboard/ Panval	Formica	Nevarmar	Pionite	Wilsonart
Woodgrains														
Almond Cherry	508837				573 Dixie Sycamore					764 Sugar Maple				
American Natural	508628	7749 Hard Rock Maple	H602 Hardrock Maple H1333 Accord Maple	WF275 Hard Rock Maple	610 Hardrock Maple		51W Hardrock Maple		L303 Hardrock Maple	992 Hardrock Maple	756 Natural Maple			
Auburn Pear	508648		H1337 Virginia Cherry				10W Pearwood			971 Pear			WX031 Pearwood	
Camby Cherry	508744			WF237 Paragon Cherry			71G Cambridge Cherry	59 Yorkshire Cherry	L657 Classic Cherry		7759 Select Cherry			7924 Biltmore Cherry
Clove	508732	7732 African Walnut	G615 Brazilian Walnut	WF220 Brazilian Walnut		W273 Mahogany Clover	50W African Mahogany	54 African Mahogany					HP273 Mahogany Clove	
Crossfire Java	508746					A48 Sipping Seattle Java							PFA48 Sipping Seattle Java	
Fusion Maple	508737			WF287 Sandy Creek Maple	795 Fusion Maple	W268 Fusion Maple		477 Fusion Maple					HP268 Fusion Maple	7909 Fusion Maple

Blue text indicates a primary color match. Black indicates a color alternative.

PLEASE NOTE: Comparisons are based on color aspects only. Grain pattern, texture, embossing and gloss level may vary significantly between products. OMNOVA recommends that customers always compare aesthetic as well as performance characteristics of different products, and obtain actual samples of the various laminate constructions before making a final selection. Comparisons should be made under controlled lighting conditions.

3D Laminates
by OMNOVA Solutions

All of Your Laminate Solutions – All in One Place

Paper, Flat, 3D and Specialty Laminates by OMNOVA Solutions

The broad scope of our product offerings and application solutions is the primary advantage that sets us apart from our competitors. No other domestic source can provide you a selection of laminates with the same breadth of constructions, colors, textures, patterns and finishes. Our laminates combine leading-edge design and functionality to achieve attractive aesthetics and surface durability.

PAPER LAMINATES

Suitable for a variety of light-duty, low-wear applications, Paper Laminates can be flat-laminated or profile-wrapped to most wood-based substrates. Available in a large variety of patterns, including hundreds of woodgrains.

FLAT LAMINATES

Suitable for numerous decorative and functional applications, Flat Laminates are flexible vinyl films that can be flat-laminated or profile-wrapped to most wood-based substrates. They are scratch, abrasion and stain resistant. A high performance coating provides an added degree of protection, durability and easy clean-up.

radiance™ Flat Laminates are designed with a higher temperature formulation than our standard Flat Laminates. They can be hot-laminated to metal and plastic to create custom surfaces that provide a more durable, cleanable and decorative solution compared to paint or powder coating treatments of metal surfaces.

3D LAMINATES

3D Laminates – also known as rigid thermofoils (RTF) – can be membrane-pressed or vacuum-formed to contoured surface profiles to eliminate the need for T-molding, visible seams, edge-banding and special edge treatments.

surf(x) 3D Laminates combine the dimensional profiling of our standard 3D Laminates with additional impact, scratch and stain resistance. Enhanced durability makes **surf(x)** 3D Laminates suitable for use on many horizontal surfaces.

EFX™ 3D Laminates are a non-PVC surfacing alternative and feature our highest level of durability and increased resistance to impact, abrasion, marring and scratching.

SPECIALTY LAMINATES

Available in a number of unique coating and film combinations, Specialty Laminates meet unique surfacing needs – everything from commercial appliances and consumer electronics to auto-motive accessories and home furnishings.

repels™ Specialty Laminates are light-gauge 1.7-mil films that provide superior water holdout compared to standard paper laminates. They help avoid unsightly – and expensive – water damage, so they're an ideal choice anywhere there's an increased risk for water damage.
