PreFixx® Protective Finish. Chemical & Disinfectant Resistance

Subject:

Guidance for Disinfection

Summary:

OMNOVA Solutions manufactures a variety of coated fabrics brands including **BoltaFlex®**, **BoltaSoft®**, **Nautolex®**, **PreVail®** and **Quantum™**. Many of the coated fabrics in these brands feature a **PreFixx** protective finish, which resists damage from disinfectants.

Cleaning After Disinfection:

The following cleaners should be used with a soft cloth or damp sponge to remove chemical residue.

- Formula 409 All-Purpose spray cleaner
- Hand dishwashing soap and water

After cleaning, rinse area with clean water, then dry with a clean, lint-free cloth. Failure to remove chemical residue will cause discoloration of the coated fabric surface to manifest earlier in the life cycle of the product.

Disinfectant Use:

In laboratory testing, upholstery protected with **PreFixx** finish was treated with the following disinfectants with little to no discoloration or damage to the upholstery. This testing may not reflect actual results in the field.*
