## V O L U M E V I

OMNOVA Solutions is excited to share the sixth edition of ***INSIGHTS***, our visual translation of emerging design trends with an intimate view of next generation decorative surfaces. Rooted in research and curated with character, this annual publication highlights key color and finish trends. This edition, **PREVAIL**, includes three design narratives with over 30 new laminate offerings.

Be inspired with ***INSIGHTS***.

Lead with Design. Lead with OMNOVA.

# PREVAIL

/pri-'vāl/

**verb**

prove more powerful than opposing forces; be victorious.

We press on and move forward, embracing responsibility for the world around us in an effort to become our best selves. In the quest for longer-lasting happiness, we know one thing is true – experiencing life is much more rewarding than consuming materials. It is better to live than to buy. It is better to endure than to stop. It is better to support than to falter.

PREVAIL strips away the noise around us to reveal a deep appreciation for the simple life. Honoring heritage, we find resiliency – overcoming challenges to craft our story.

**03** PATH

A close-up photograph of a person's hands holding a heart-shaped arrangement of driftwood. The hands are positioned at the bottom, with the fingers gently gripping the base of the heart. The driftwood is composed of various pieces of weathered, light-colored wood, arranged to form a symmetrical heart shape. A small, bright yellow flower with a green stem is placed in the center of the heart, adding a touch of color and life to the composition. The background is a soft, out-of-focus natural setting with green foliage and a bright sky, creating a serene and romantic atmosphere. The overall tone is warm and intimate.

# HEARTFELT

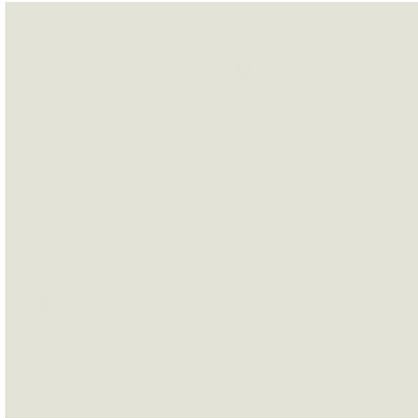

## *In benevolence, we find fortune.*

During moments of chaos and the seemingly unending repetition of disorder, it is a back-to-basics mentality that tethers us to the ground. When touch has been ruled a rebellious act, we crave the use of tactile and textured materials that give us something to feel.

With an eye towards benevolence, a purchase-with-a-purpose attitude emerges, providing a heightened sense of awareness to what is unseen behind a good or service.

The earthy hues in HEARTFELT's color palette reflect our need to respect Mother Nature and an increasing responsibility to protect our planet, not just for our generation, but for generations to come.

As you crave food when you are hungry, touch is a basic human need craved in darkness or loneliness. The feel of a soft-touch, tactile material is more important now than ever as hugs, kisses and even handshakes are actions from what seems a distant memory.

Light and dark areas combine to create infectious energy and remind us of the role we play in protecting the planet. We must leave the Earth in a better condition than we found it to generate healthy and uncompromised living for the future.

# ESSENTIAL

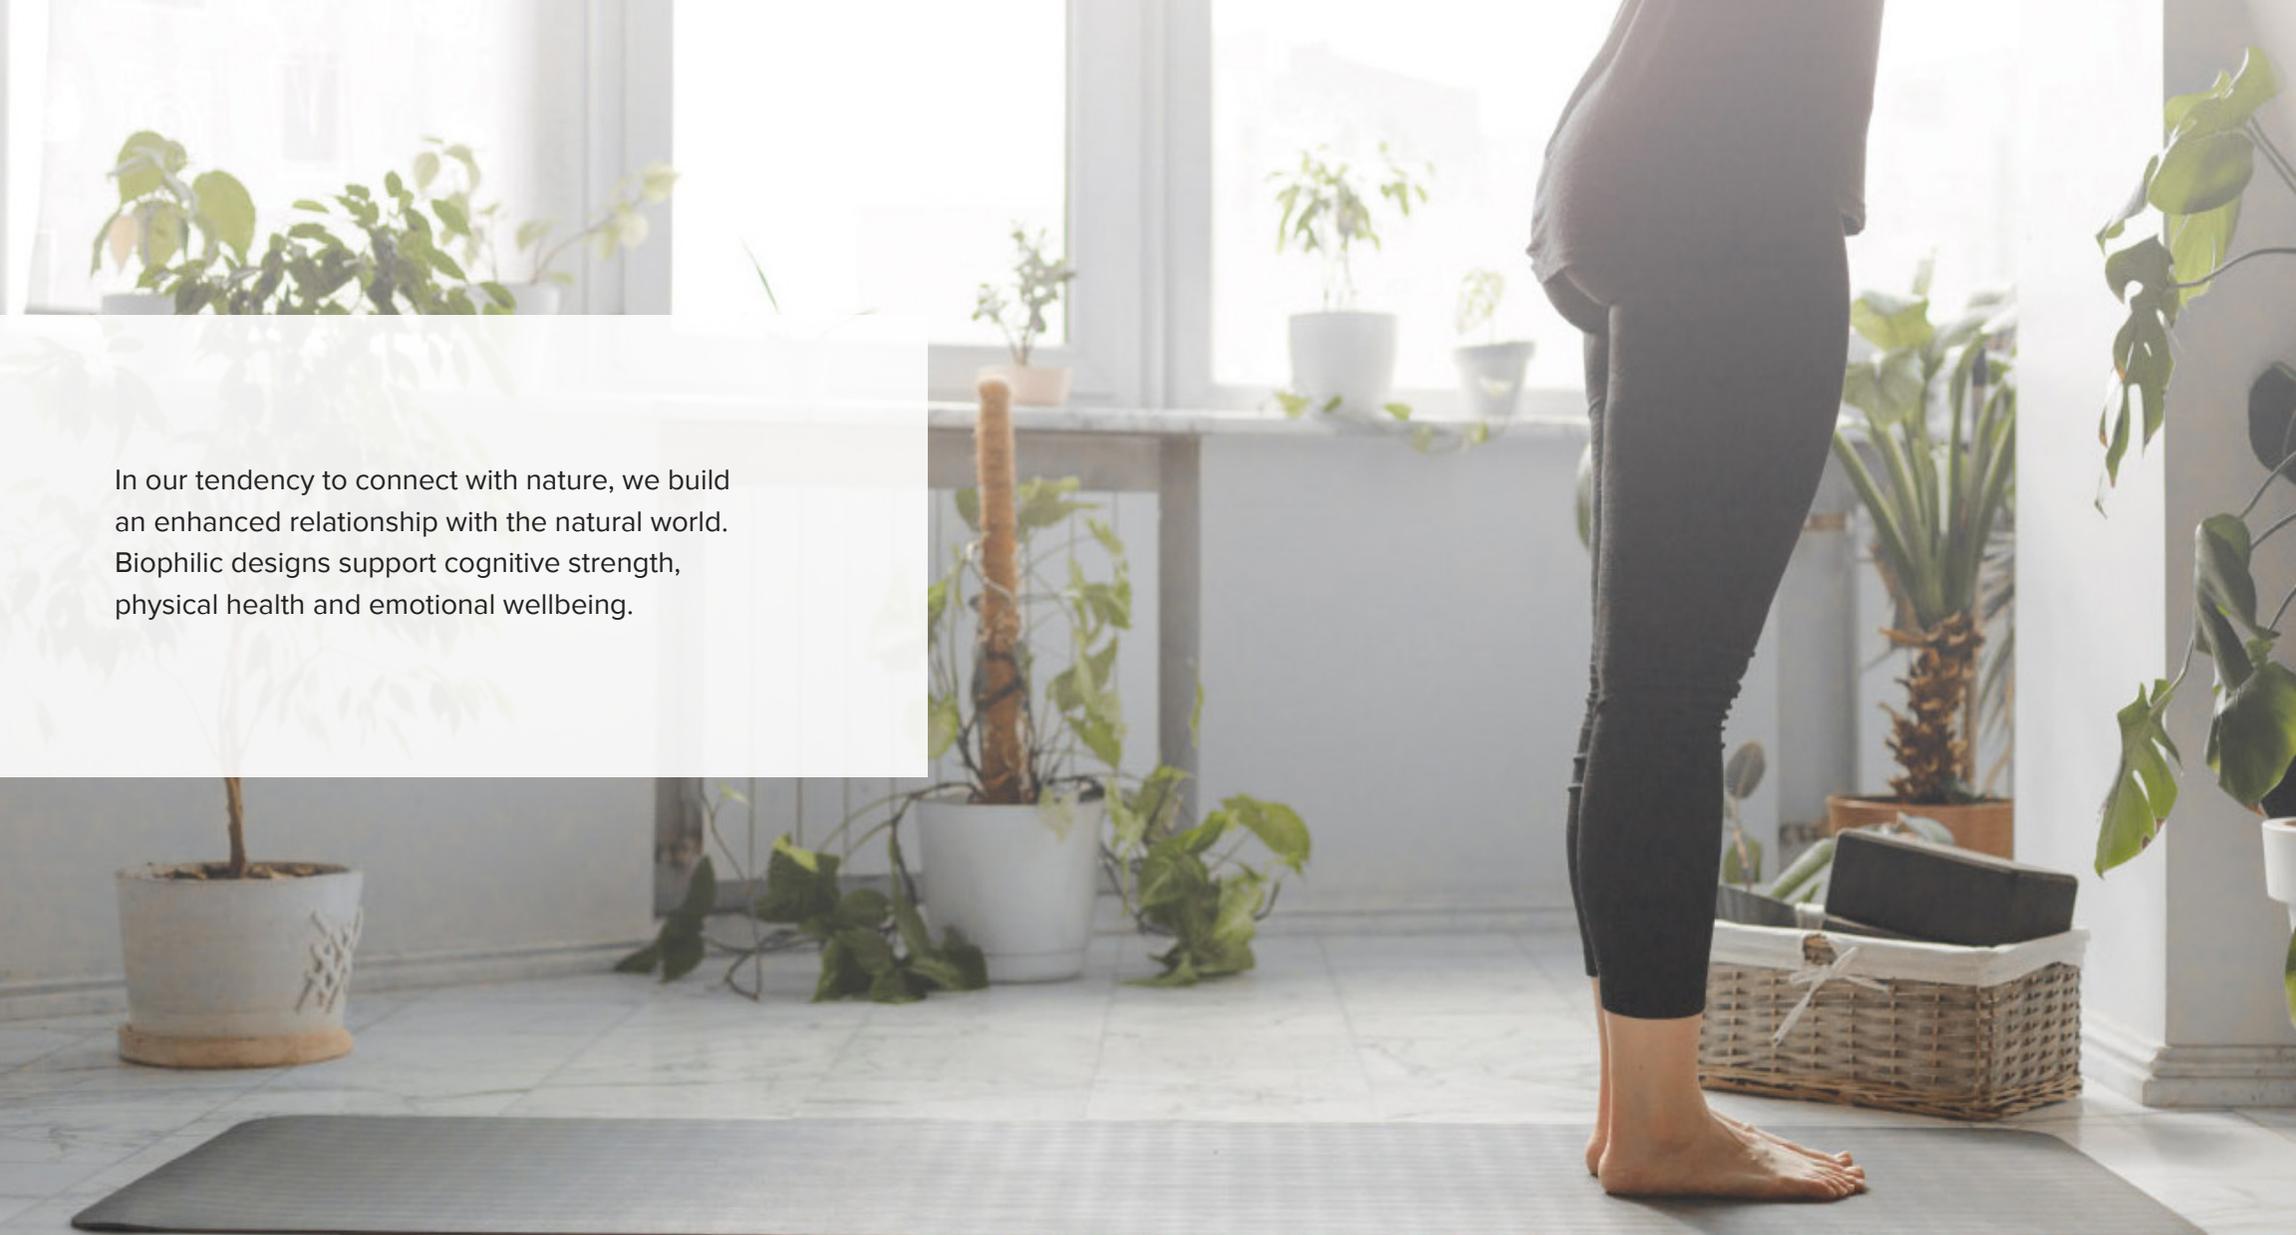

## *In wellness, we find balanced respite.*

Patterns, textures and colors have a direct impact on our wellbeing.

The move from interior to exterior living spaces creates open circulation of both air and people, culminating in feelings of positive health.

ESSENTIAL offers designs that improve our mental and physical wellness through the creation of moments of introspection, reflection and comfort.

In our tendency to connect with nature, we build an enhanced relationship with the natural world. Biophilic designs support cognitive strength, physical health and emotional wellbeing.

Authentic evolution and the capacity of the human spirit to unite and create inclusive narratives through craft and spoken word. Textured designs provide a realistic appearance that strengthens our bond with nature.

# PATH

*In rebirth and resistance, we find the beauty of change.*

The increased use of virtual reality as an escape into a more perfect world is a welcome distraction from the stress of everyday life. By making calculated choices instead of accepting cultural norms, power can be reclaimed by those who feel the burden of oppression. Giving new life, the reverse supply chain known as "recommerce" exemplifies a growing trend toward transforming consumption through reuse and repurpose.

PATH's color palette is inspired by a desire for continuous transformation.
