

Vinyl Upholstery Cleaning Instructions

Boltaflex® Vinyl Coated Fabric

To minimize any problems from stains, all stains should be cleaned as soon as they are noticed, making sure the recommended cleaning agents are used in the following order:

Normal Care and Cleaning

Remove ordinary dirt and smudges with a mild soap and water solution and a clean soft cloth or towel. Dry with a soft lint-free cloth or towel. For more difficult stains, continue to the special cleaning instructions below. Do not use abrasive powder, steel wool, or industrial strength or solvent cleaners. The use of upholstery “conditioners” or “protectants” is not recommended and should be avoided on all **Boltaflex** vinyl coated fabrics.

Special Cleaning Problems

Use one of the following recommended non-abrasive cleaners with a soft cloth or damp sponge.

- Formula 409 All-Purpose Spray Cleaner.
- Fantastik Spray Cleaner.

Rinse cleaned area with fresh water then dry with a clean, lint-free cloth.

Boltaflex vinyl coated fabrics can be cleaned and disinfected with a 10% diluted household bleach (sodium hypochlorite) solution (1:9 bleach to water ratio). Following cleaning and disinfection with bleach, rinse cleaned area with fresh water then dry with a clean lint-free cloth.

Also, note that repeated use of any disinfectants and cleaning agents will degrade coated fabrics upholstery to some extent. For high traffic/wear applications that require repeated cleaning and disinfecting, it is recommended to use coated fabric products with **PreFixx**® Protective Finish.
